

# ORGANIC CEREAL GRASSES & MICROALGAE

## Spirulina

## Chlorella

## Cereal Grasses

Functional green foods and dietary supplements have evolved considerably over the last few years. Product development and messaging has shifted away from the simplicity of “eat more greens” and into the complex realm of condition-specific categories and multifaceted blends. With all the new products on the market, it’s more critical than ever to distinguish your products and brand through innovation and outstanding quality.

Despite the rise in popularity, one of the biggest challenges is making a greens product taste good. With an in-house applications laboratory and our staff of food scientists, RFI has an enormous amount of experience in providing our customers with formulas that not only taste good, but also offer the highest possible standards for quality and efficacy.

Rely on RFI to help you create best-in-class finished products that stand out, even in the most crowded or competitive categories.

## SourceSustainable® Organic Spirulina

Sustainably grown and processed in GMP-certified facilities located in the coastal economic zone of Jianggang, Dongtai Jiangsu China, where is recognized by UNESCO (United Nation Educational Scientific and Cultural Organization) as the only unpolluted coast in the west Pacific ocean.

### SourceSustainable® Organic Spirulina Features and Benefits

- ▶ FDA-notified GRAS – “no questions” response from FDA

# ORGANIC CEREAL GRASSES & MICROALGAE

## Sourcestainable® Organic Chlorella

**Sourcestainable® Organic Chlorella** is grown and processed in a ISO-22000 GMP-certified facility in the Yongfeng Forest Agricultural Ecological Park, Dongtai Jiangsu China, along coastal development zone where is environmentally protected away from pollution

Our Chlorella cultivation uses high quality, fossil water found 2,000 feet deep. Fossil water is an ancient body of water that has been undisturbed for millennia. This results in low heavy metals.

In addition, **Sourcestainable® Organic Chlorella** is processed using a proprietary system called Low Temperature Breaking Cell Wall Technology Using ultra low temperature (below 5° F), the cell wall is broken in a fully closed chamber, free from contamination.

**With a high rate of broken cell wall (>95%), this gentle process also results in minimal nutrient loss (<5%) and high digestibility.**

### Chlorella Features and Benefits

- ▶ Self-affirmed GRAS by expert panel
- ▶ USDA National Organic Program (NOP)-certified
- ▶ Cultivated with spring water from protected Nature Reserve
- ▶ Grown and processed in compliance with ISO-22000 and GMP standards
- ▶ Patented broken cell wall process to increase digestibility
- ▶ Supports natural detoxification
- ▶ Enhances immune function
- ▶ Supports cardiovascular health
- ▶ Vegan protein source

## Sourcestainable® Organic Cereal Grasses

RFI is proud to offer a full line of certified-organic cereal grasses, grown on RFI-controlled fields in North America and China. By maintaining farming and manufacturing programs in two distinctly different continents, we can take advantage of two separate growing seasons—allowing us to produce these products year-round!

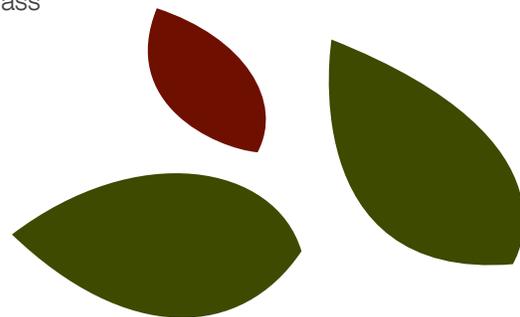

Our farm-fresh cereal grasses are planted and harvested based on each grass' optimal growing season, then harvested at the moment of peak nutrition.

We currently offer the following spray-dried or dehydrated powders:

- ▶ Alfalfa Grass
- ▶ Barley Grass
- ▶ Wheatgrass
- ▶ Oat Grass

### Sourcestainable® Organic Cereal Grasses Features and Benefits

- ▶ Gently processed to protect their naturally-occurring nutrients
- ▶ Available in carrier-free versions or with alternative carriers upon request
- ▶ Highly-soluble green products
- ▶ Low microbial counts
- ▶ USDA and EU organic
